

Discovery Dynamics in the Adjacent Possible

Mathlib | 99,412 theorems | 48,081 roots | Theorem-Theorem DAG | 4 strategies x 3 recall modes x 17 memory sizes x 4 budgets

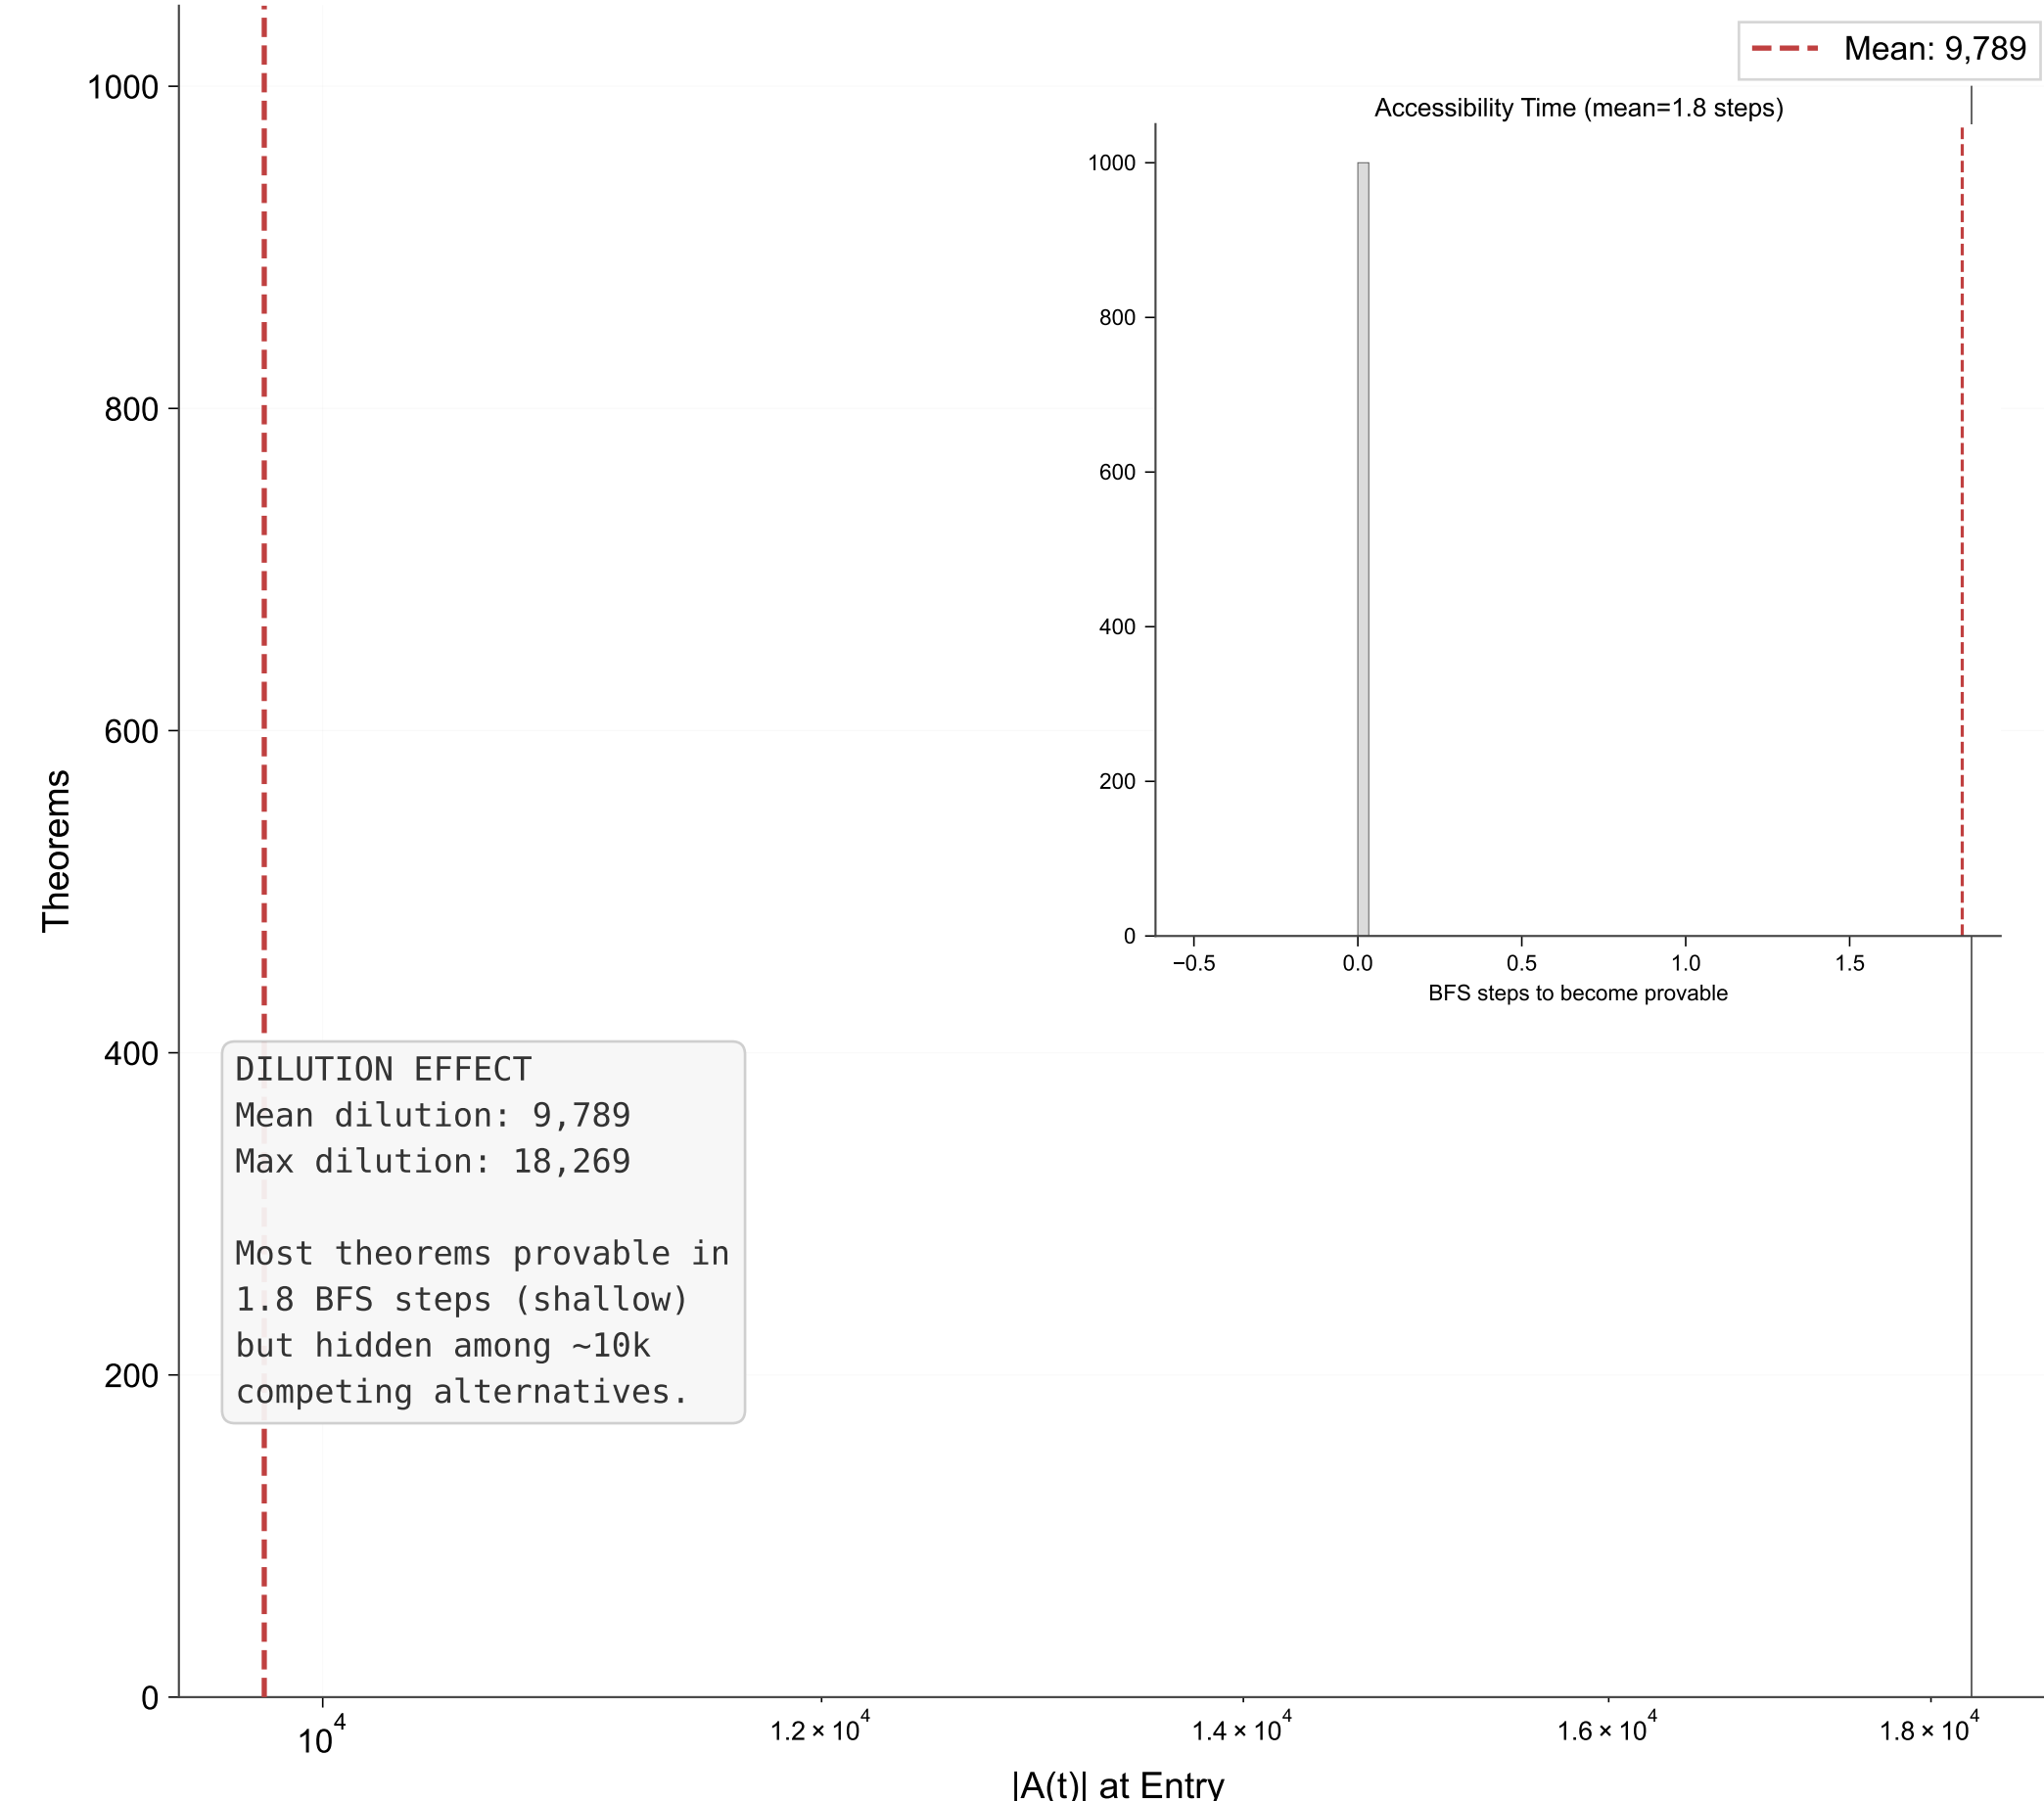

A. $|A(t)|$ Possibility Space

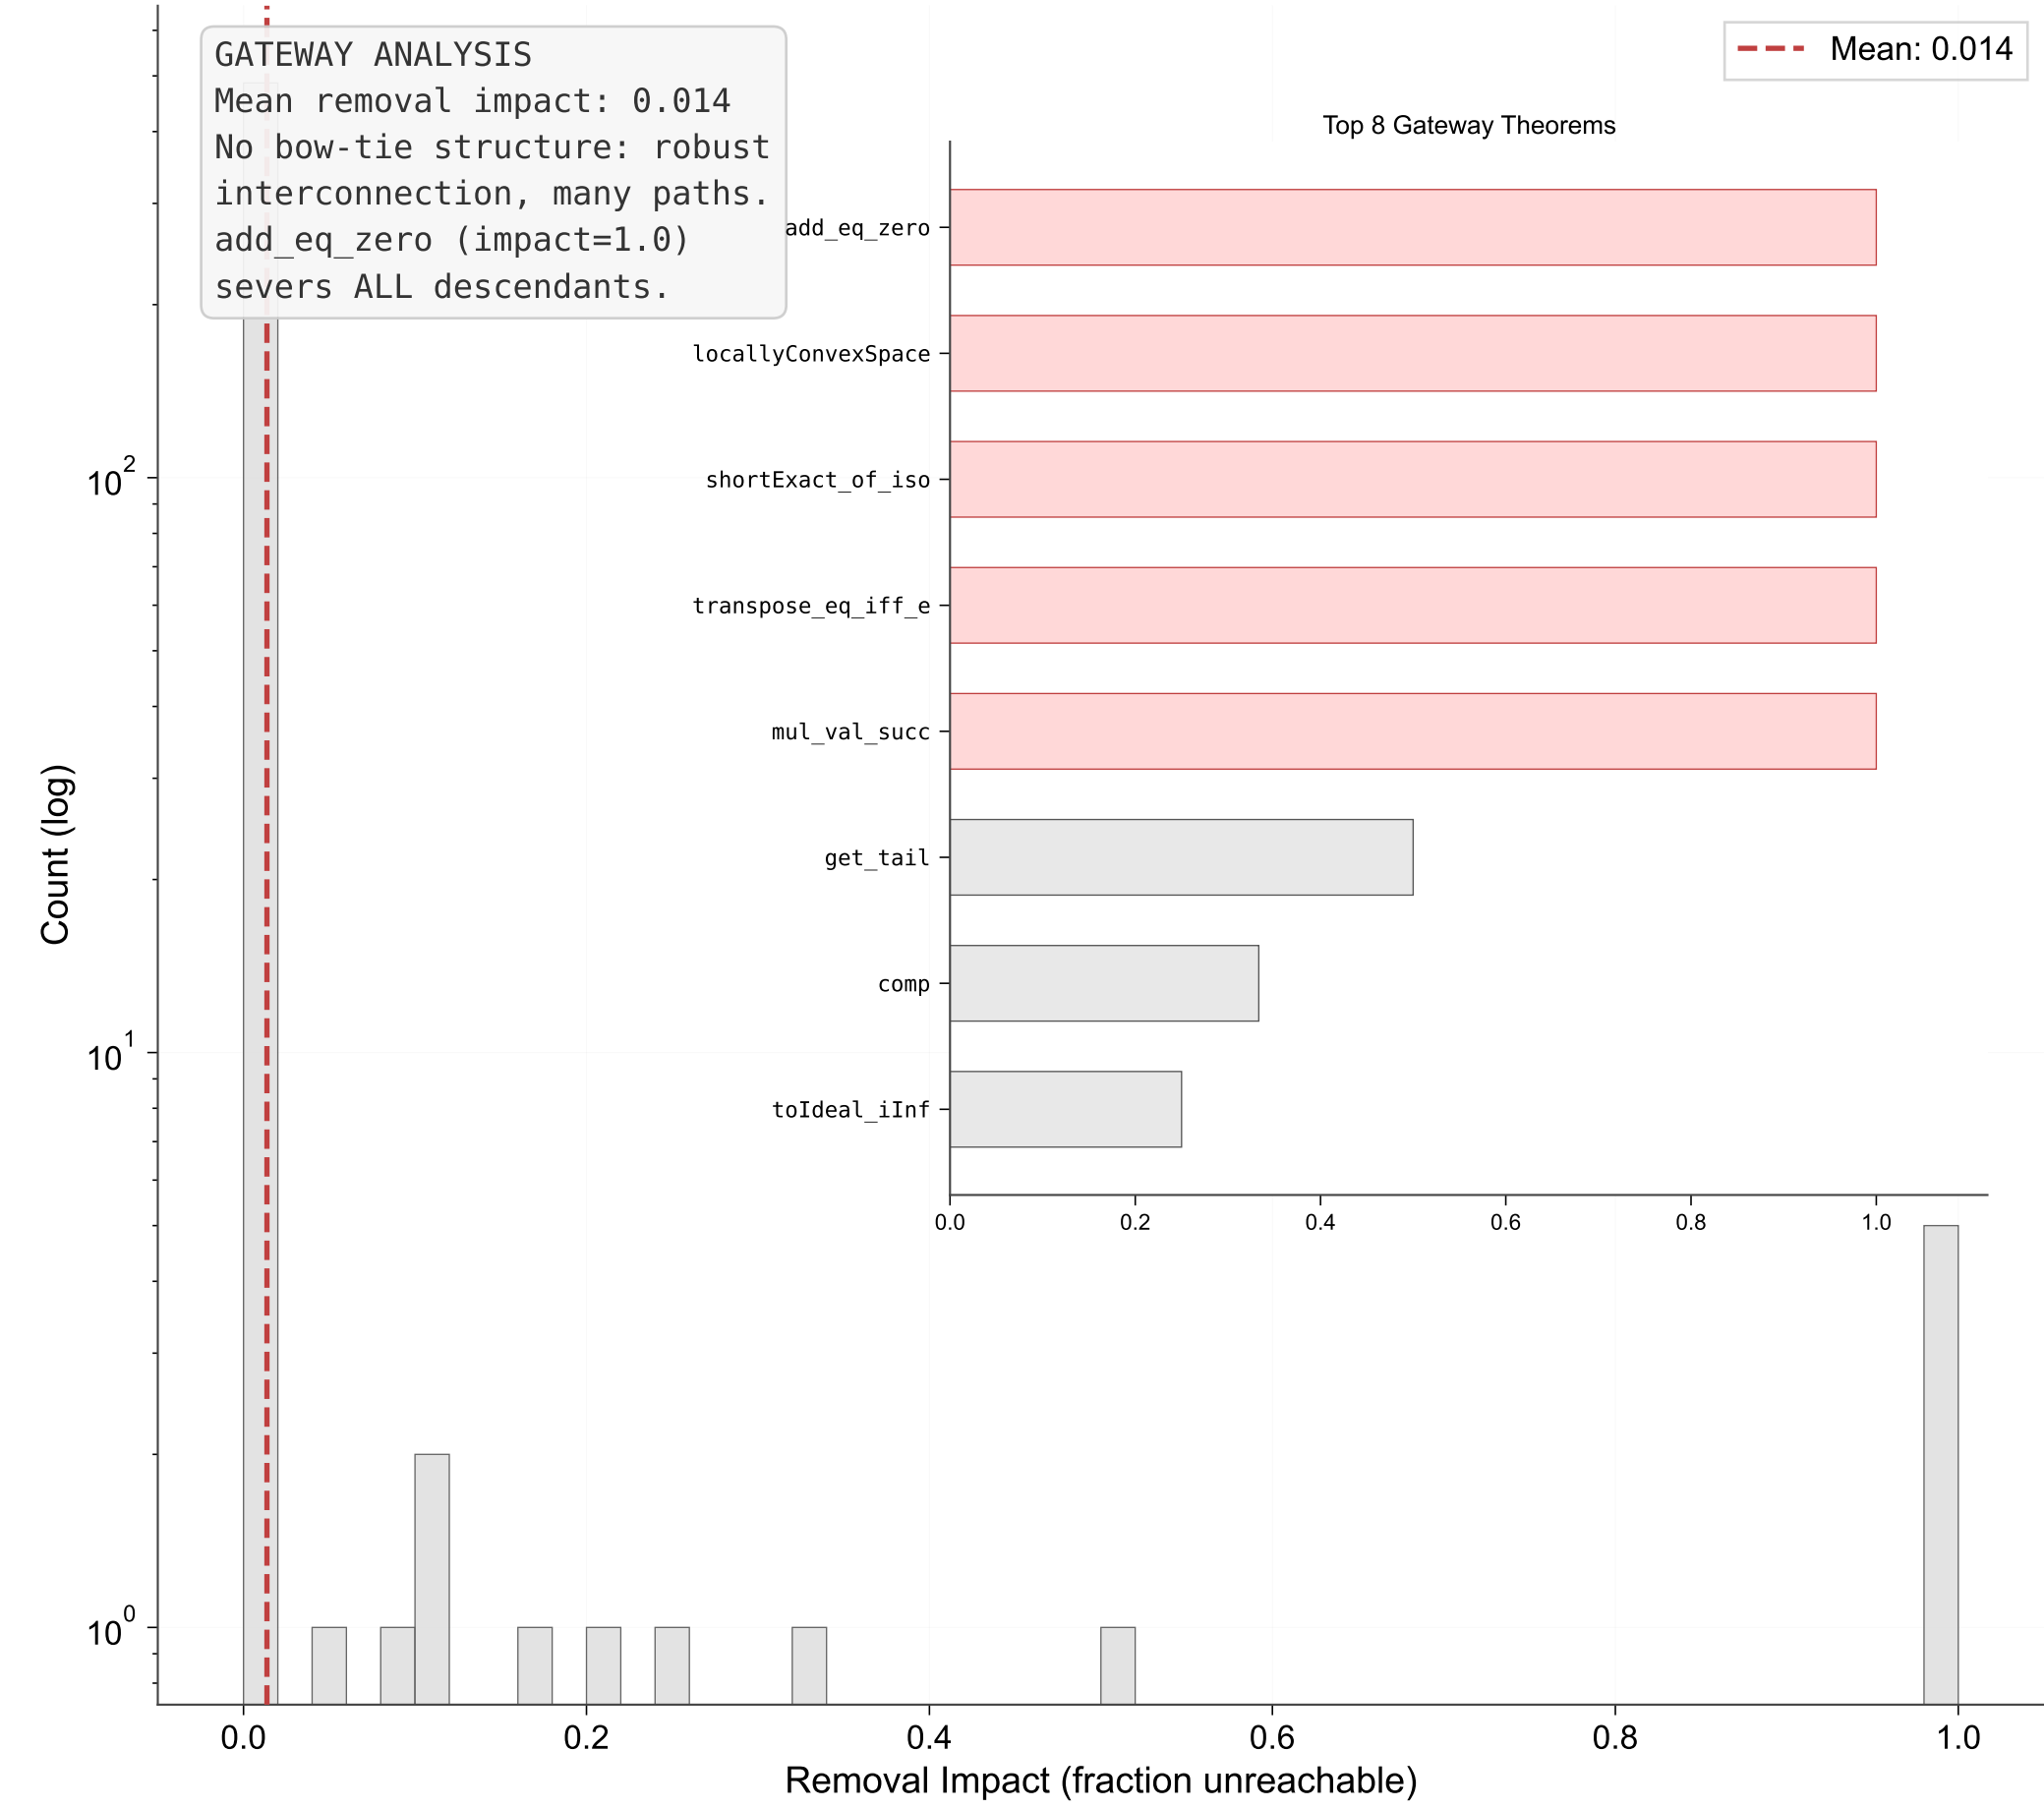

B. Knowledge Accumulation

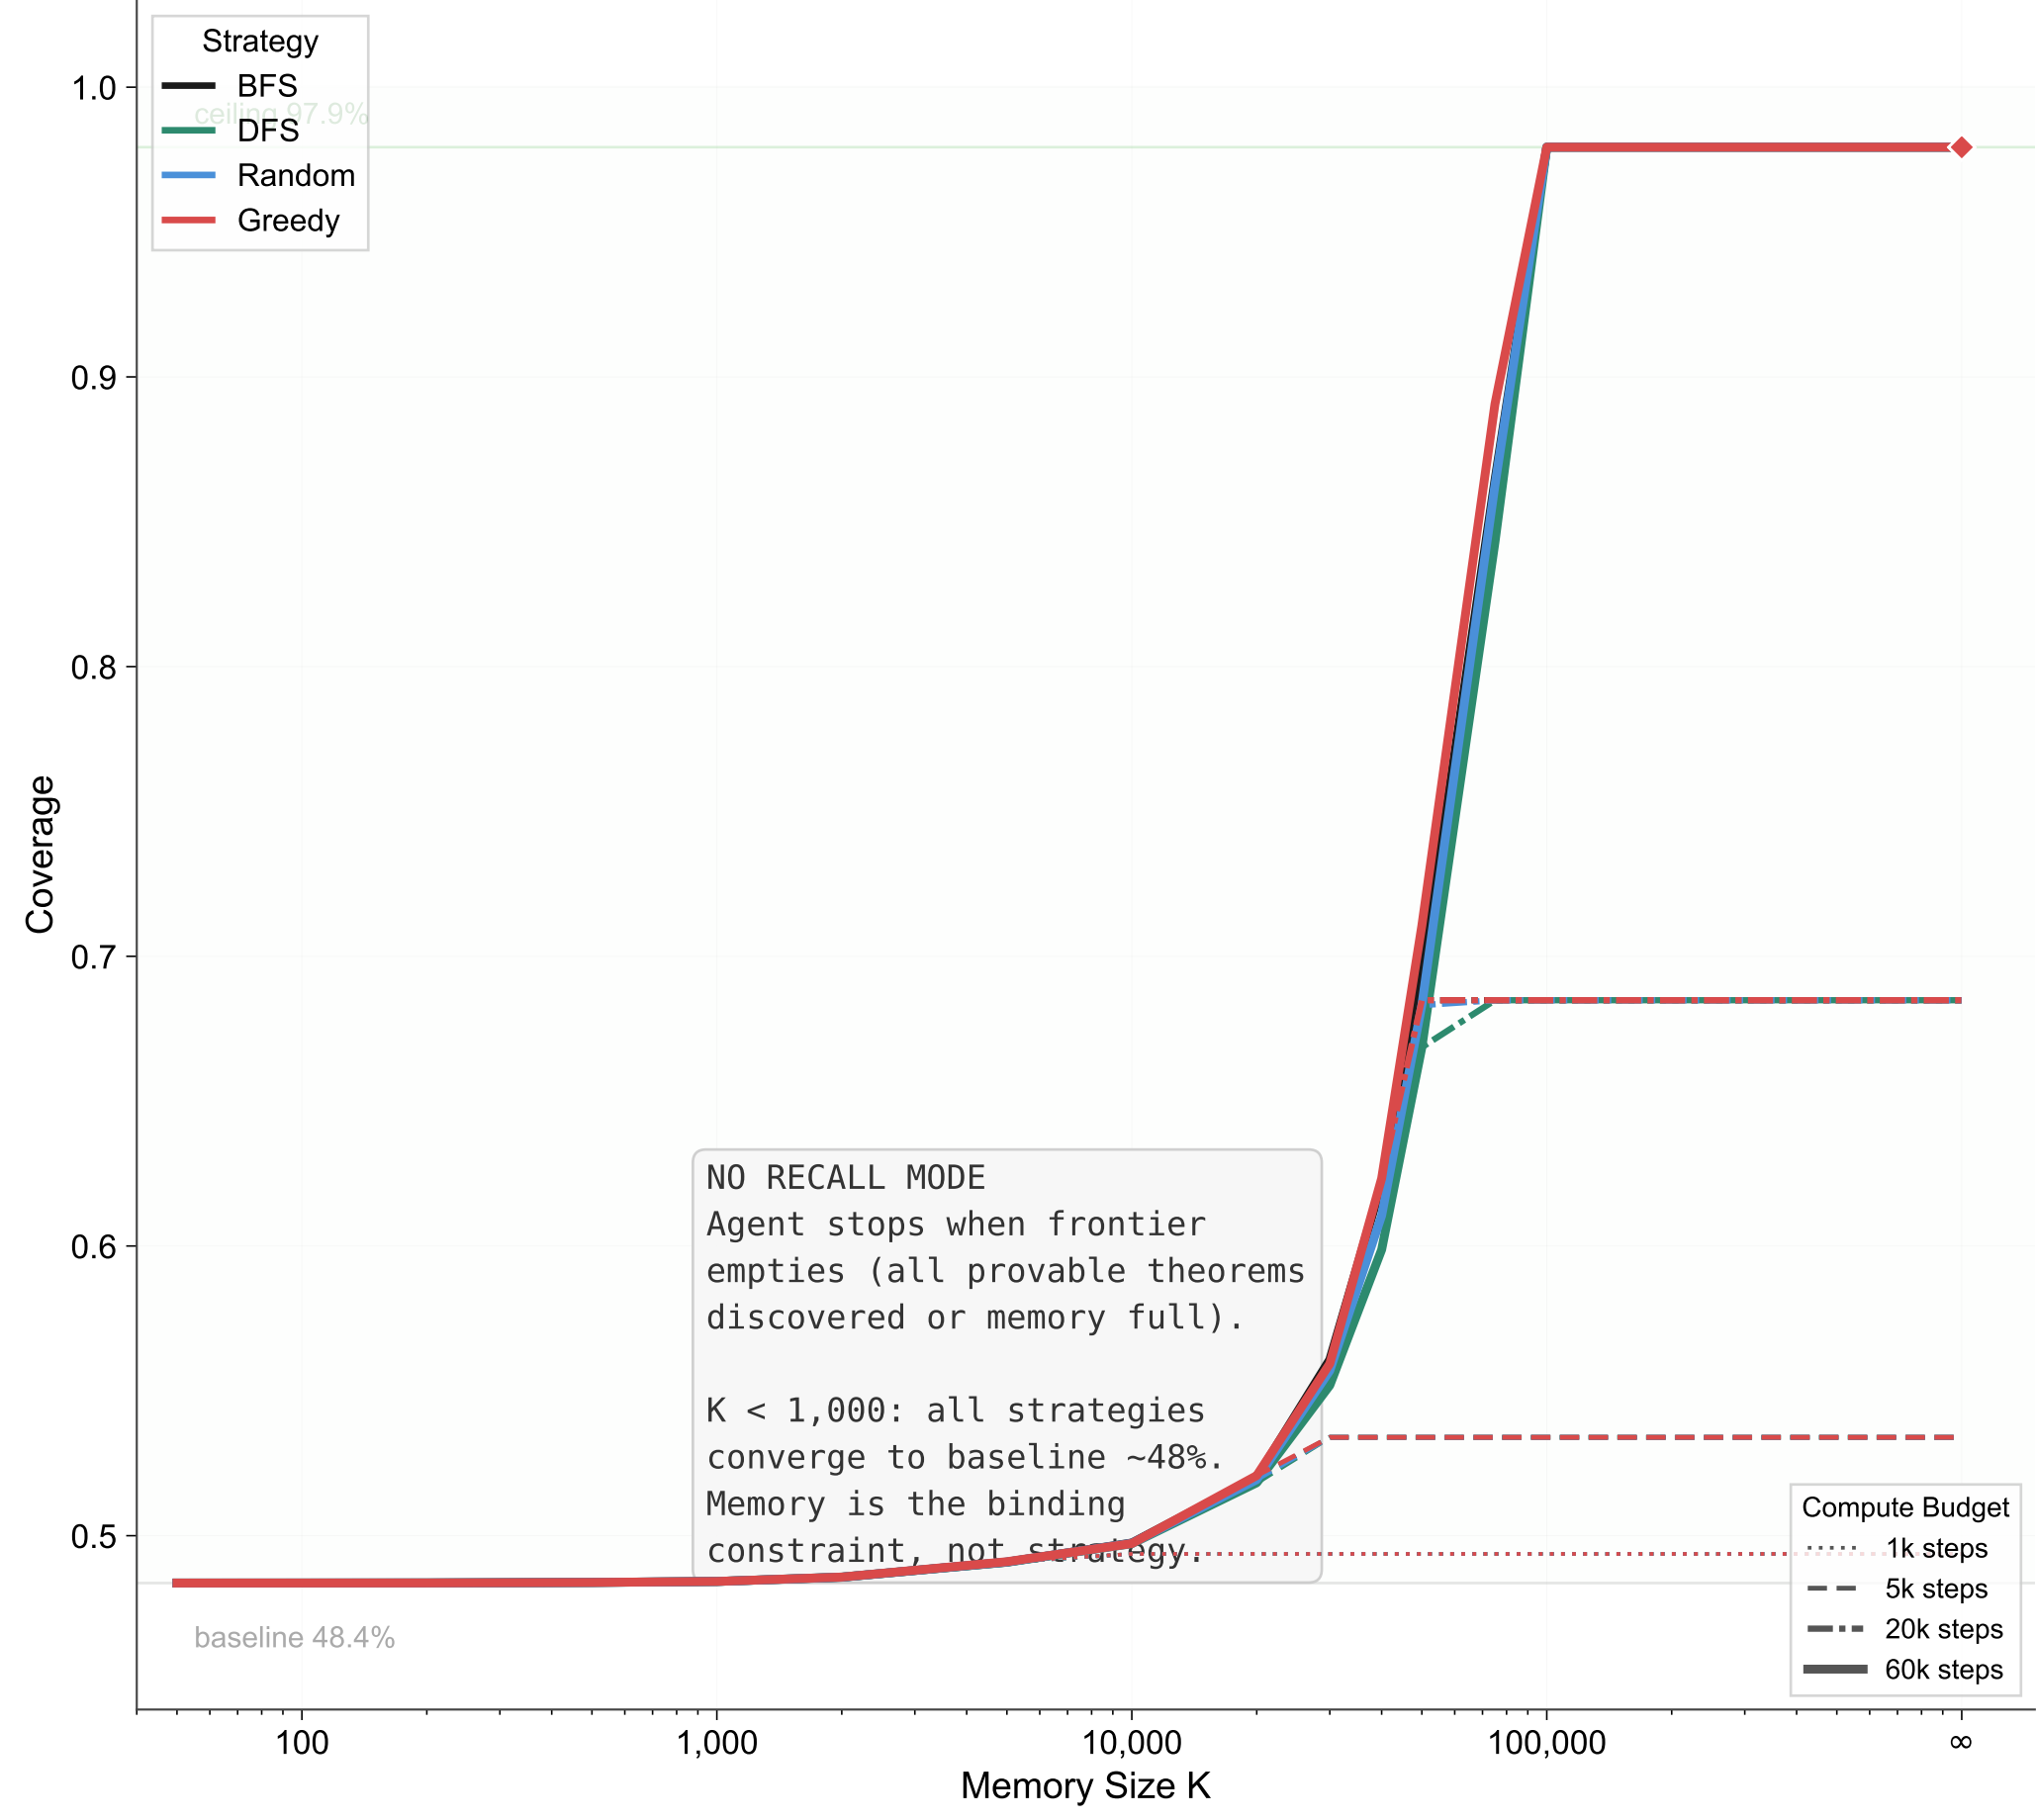

C. Dilution: "Hiding in Plain Sight"

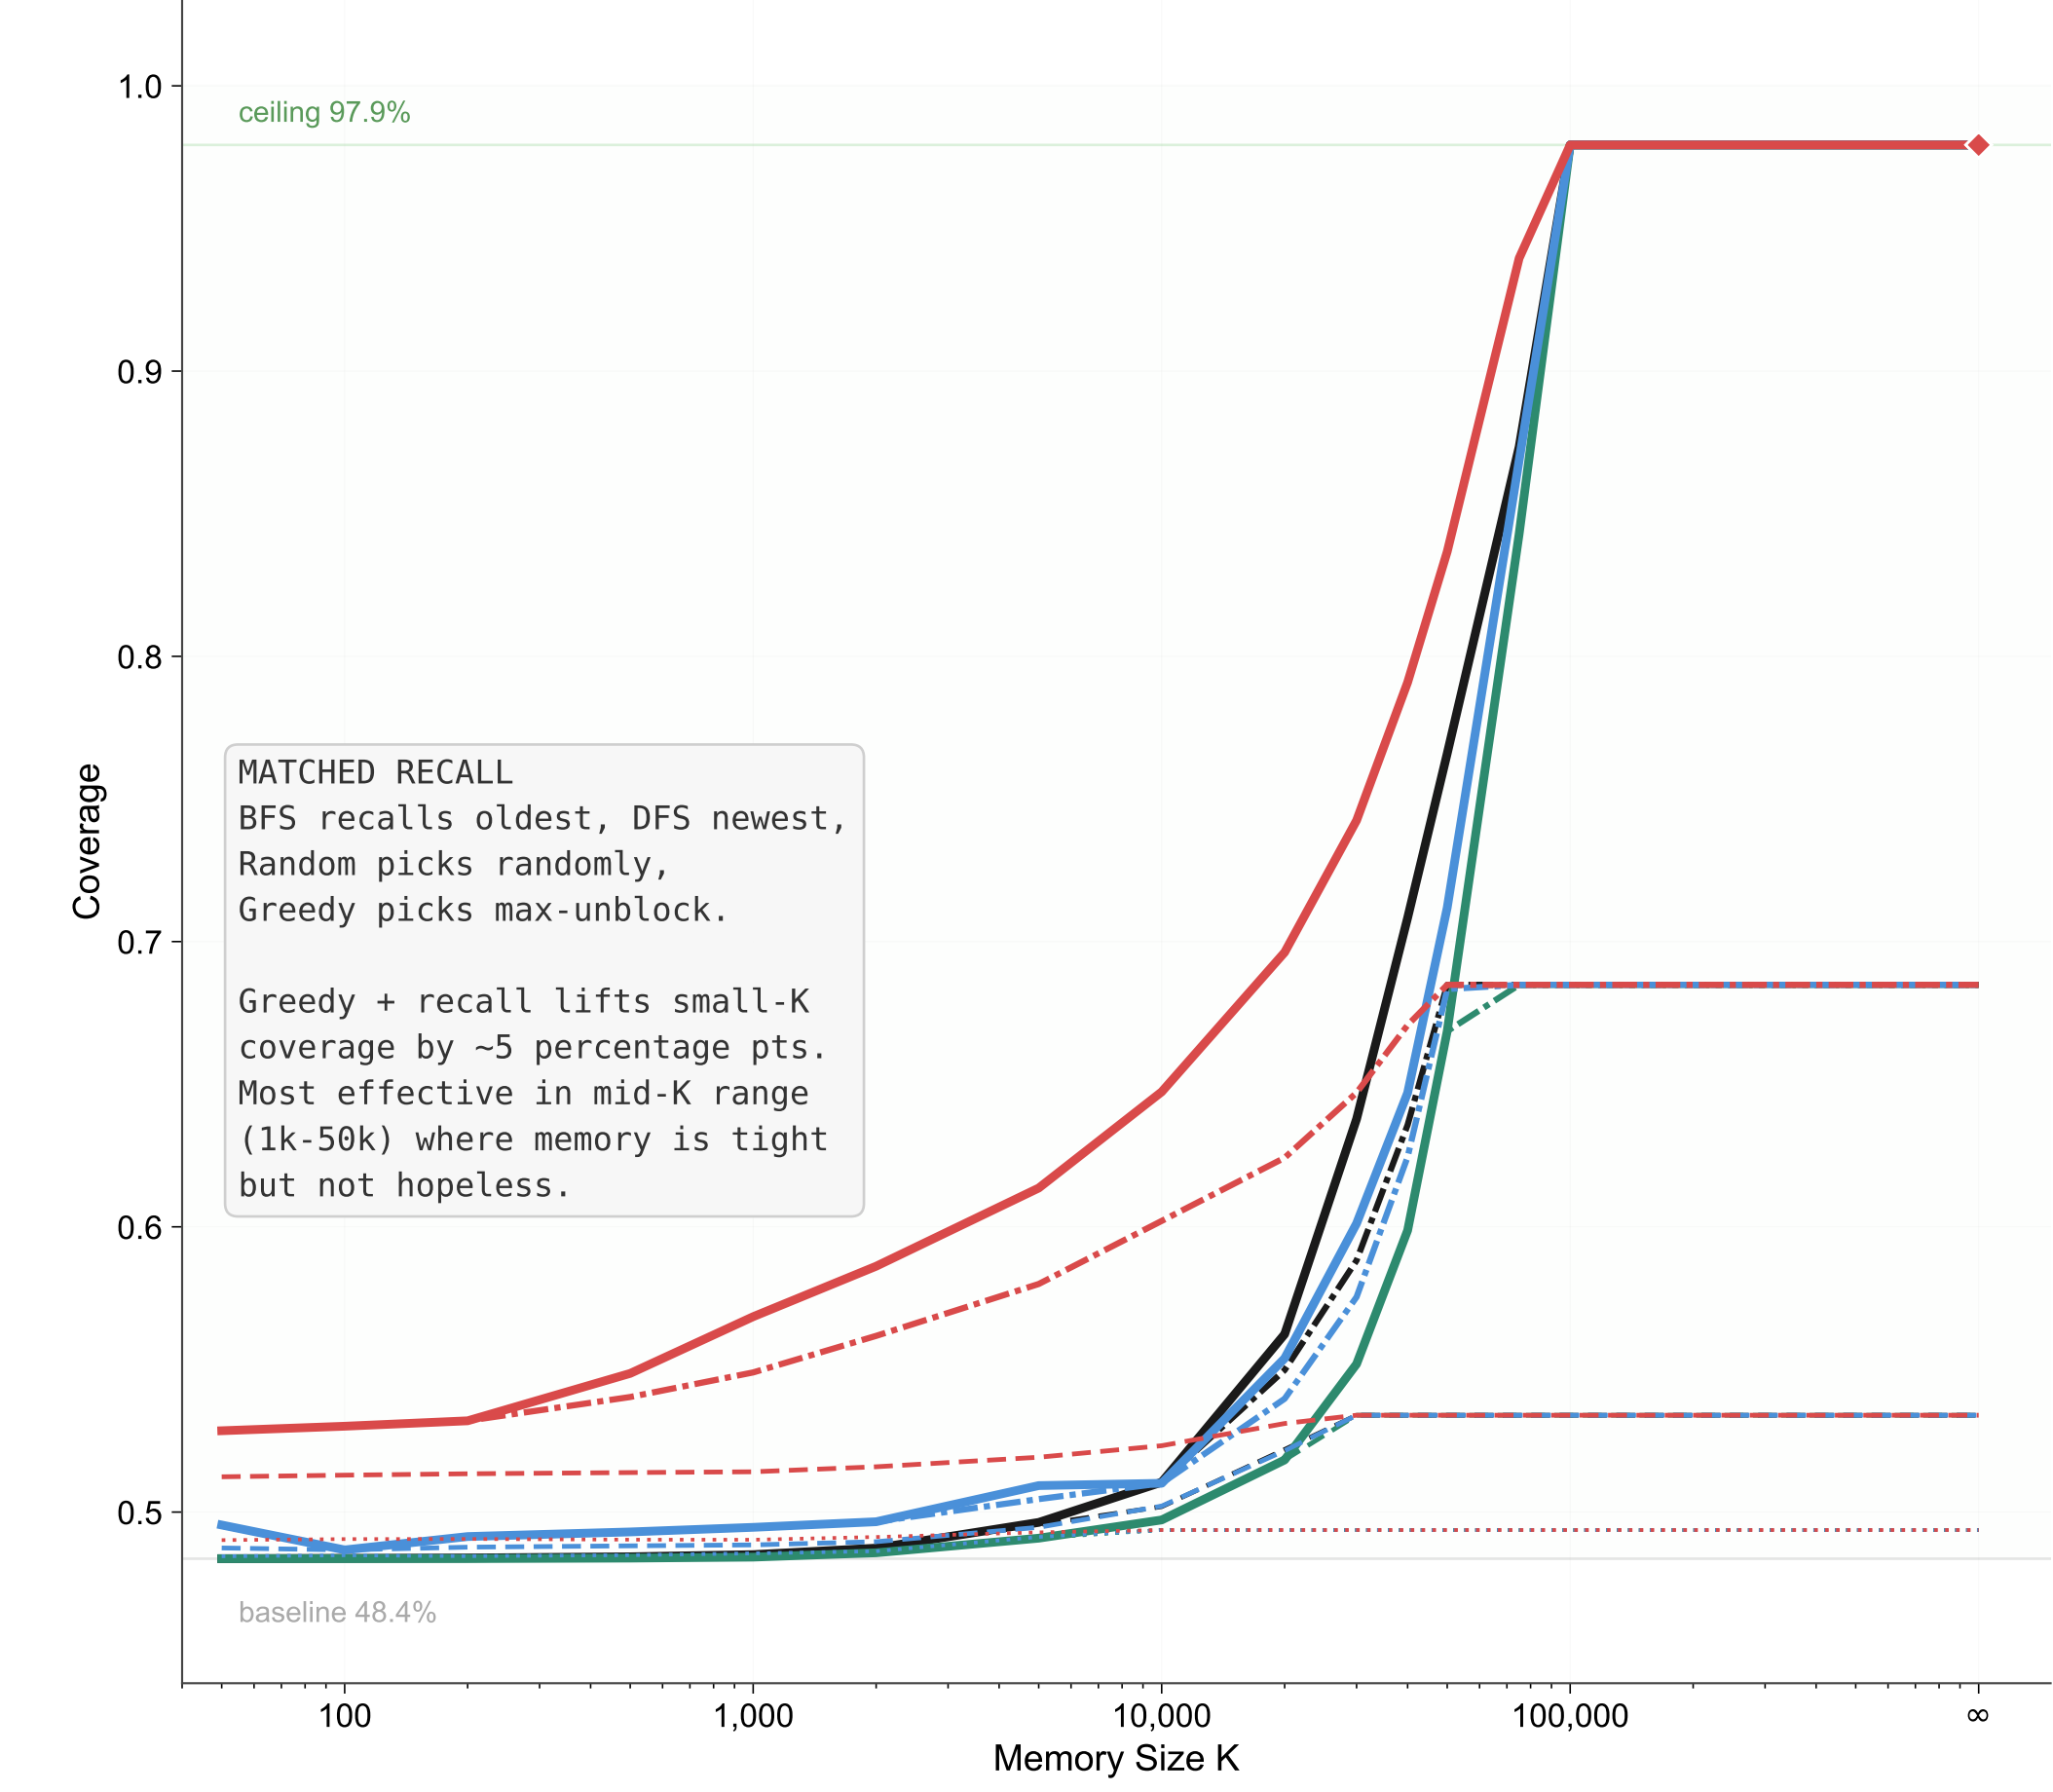

D. Gateway Theorem Identification

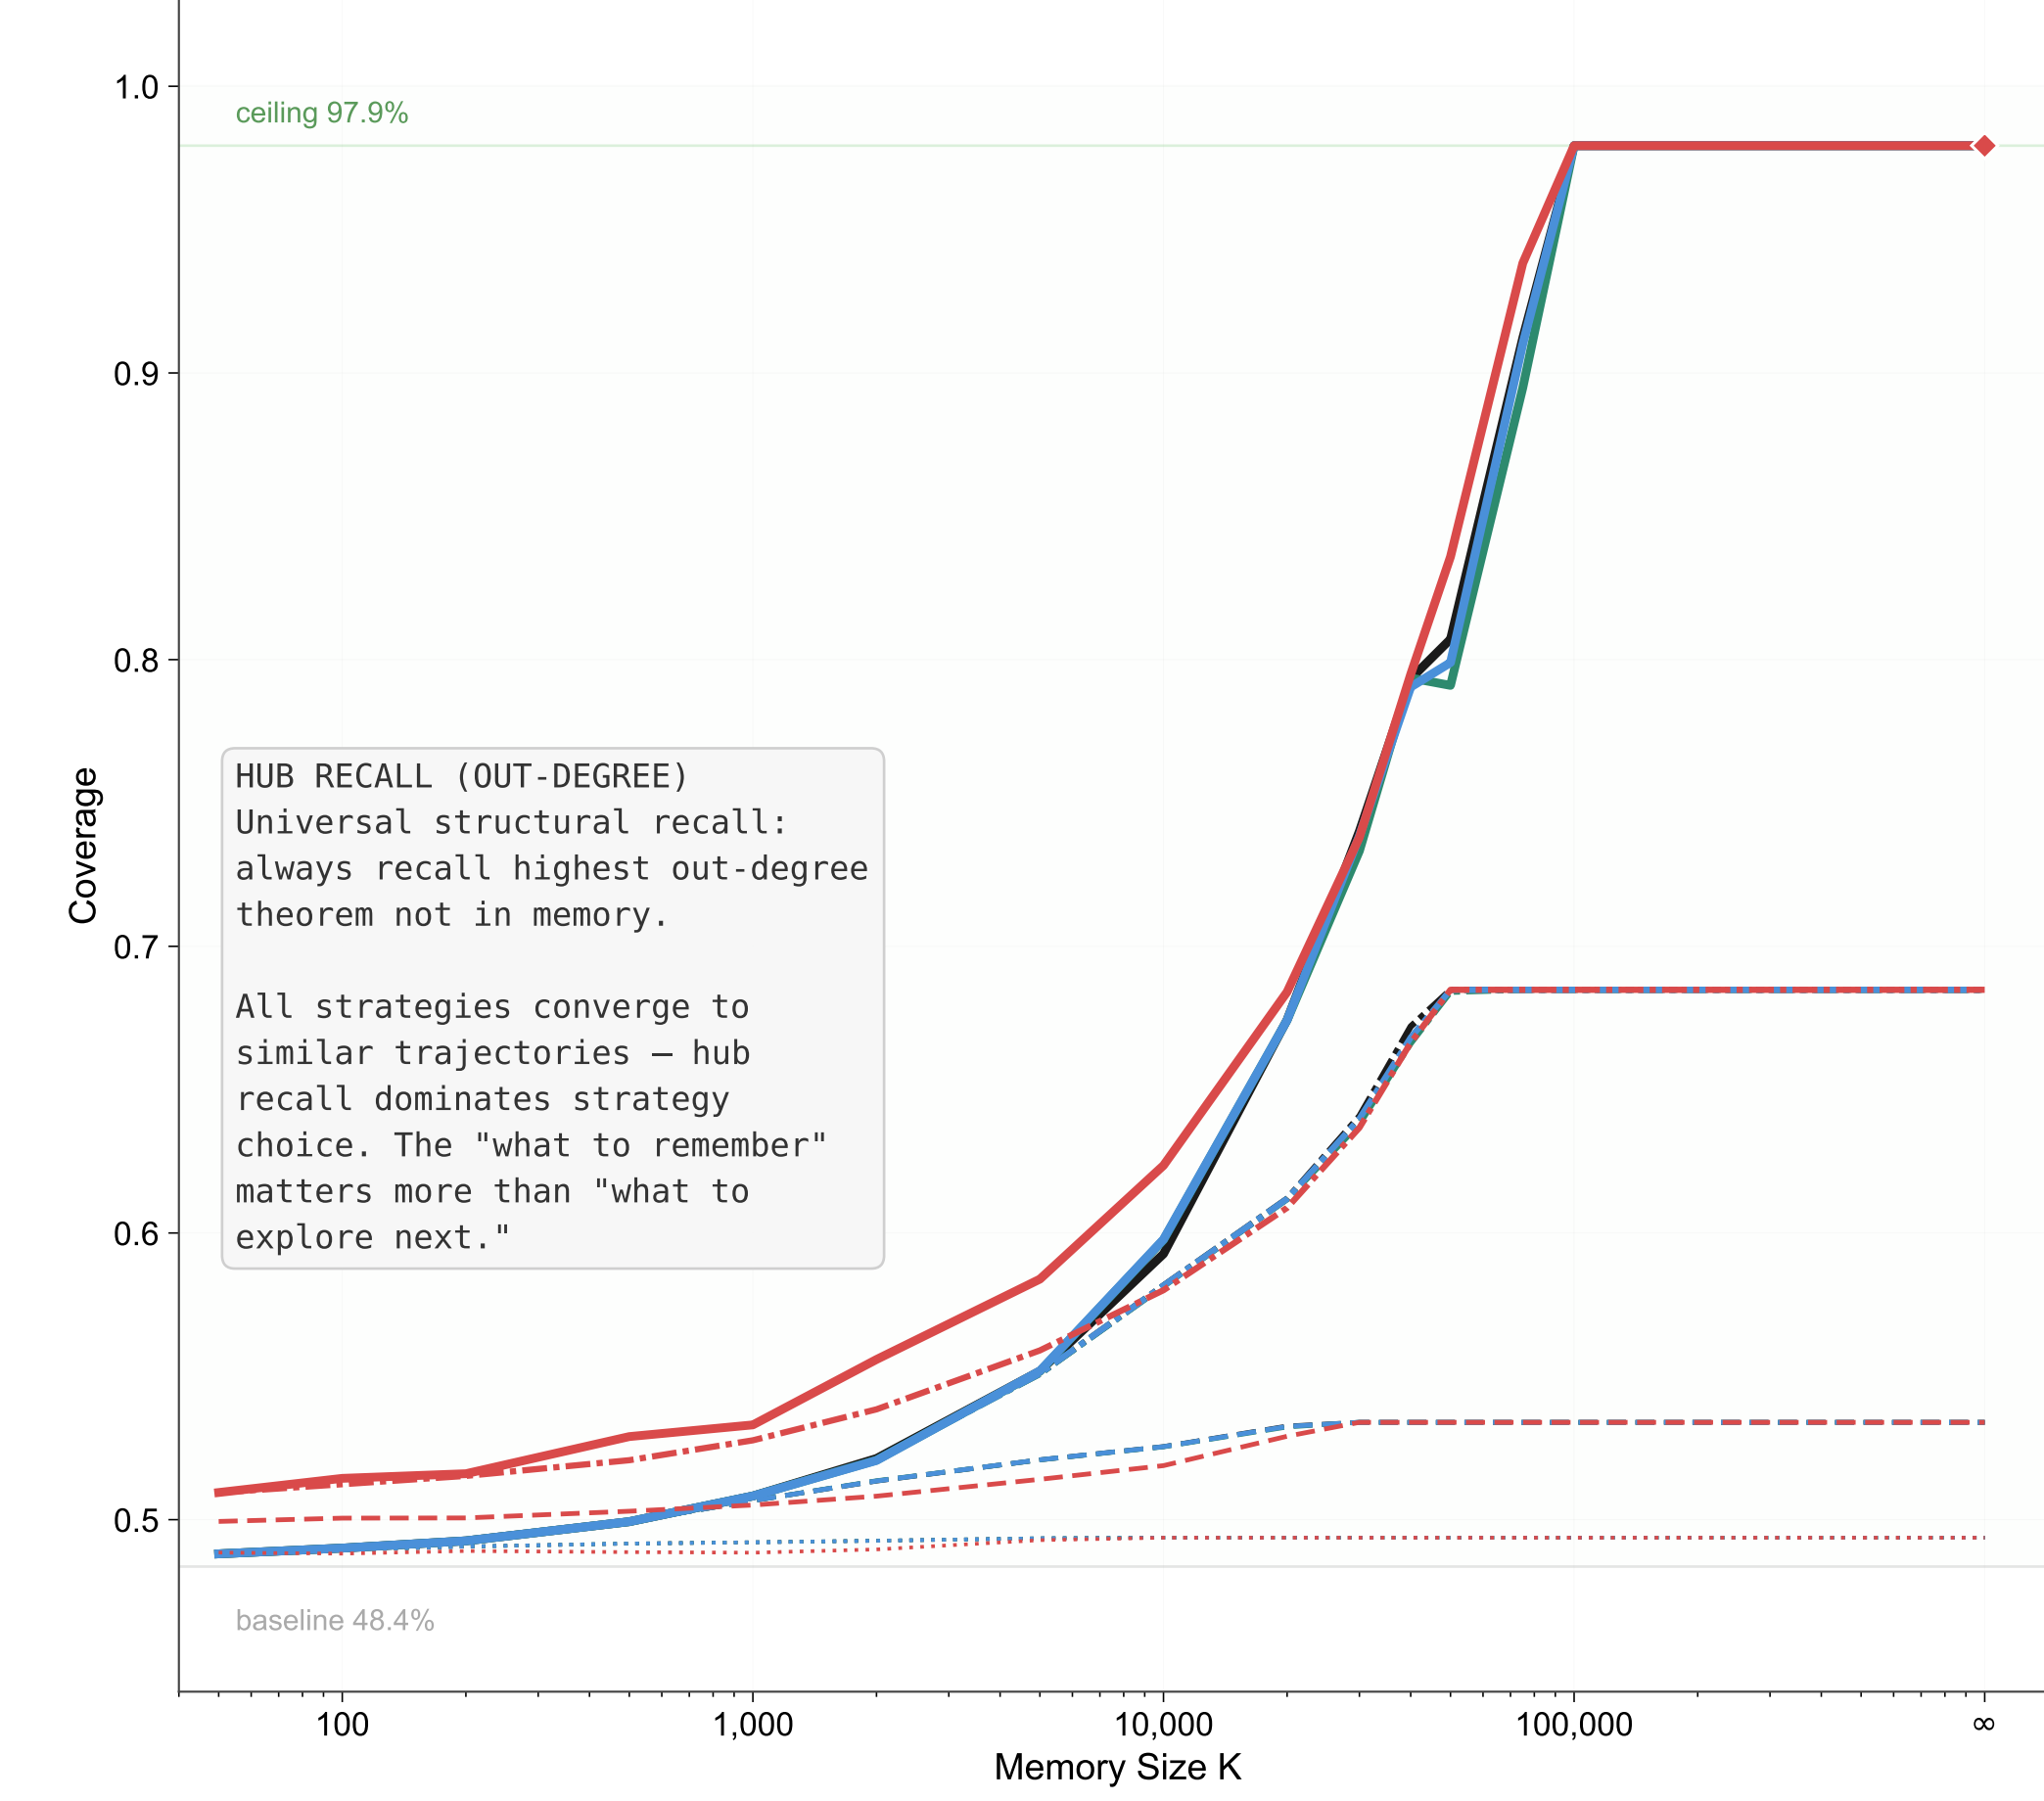

E. Phase Transition: No Recall

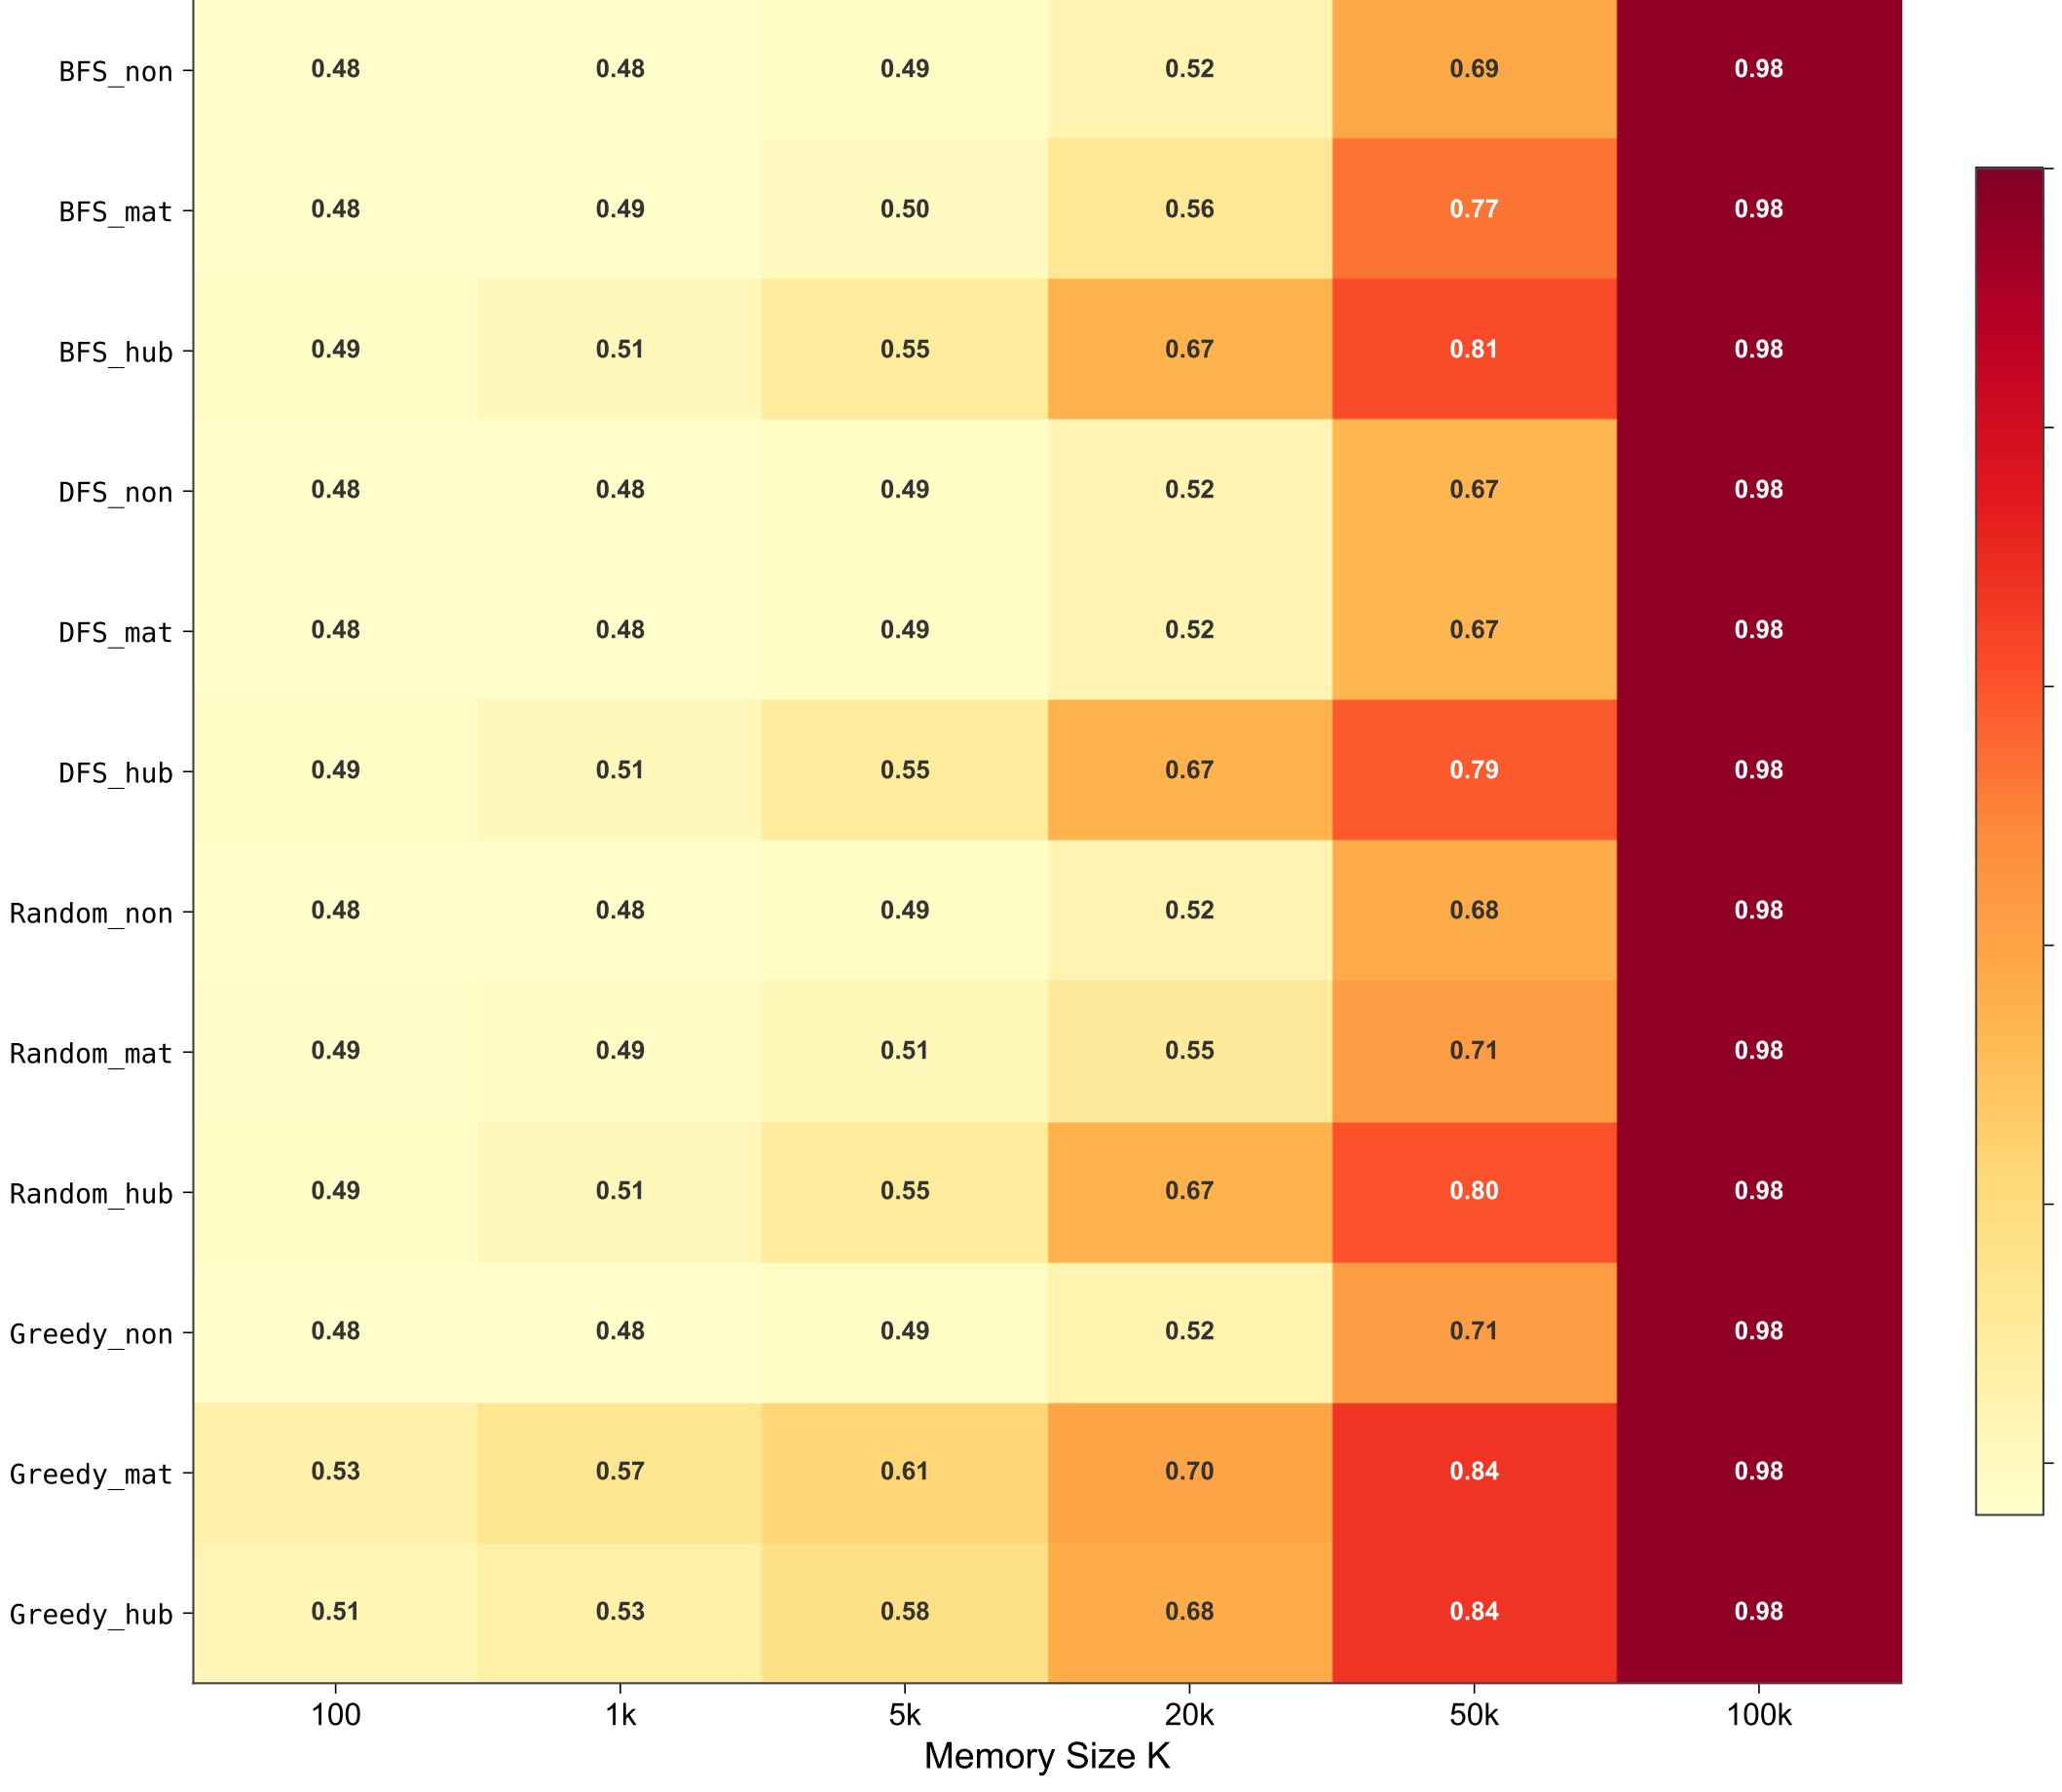

F. Phase: Strategy-Matched Recall

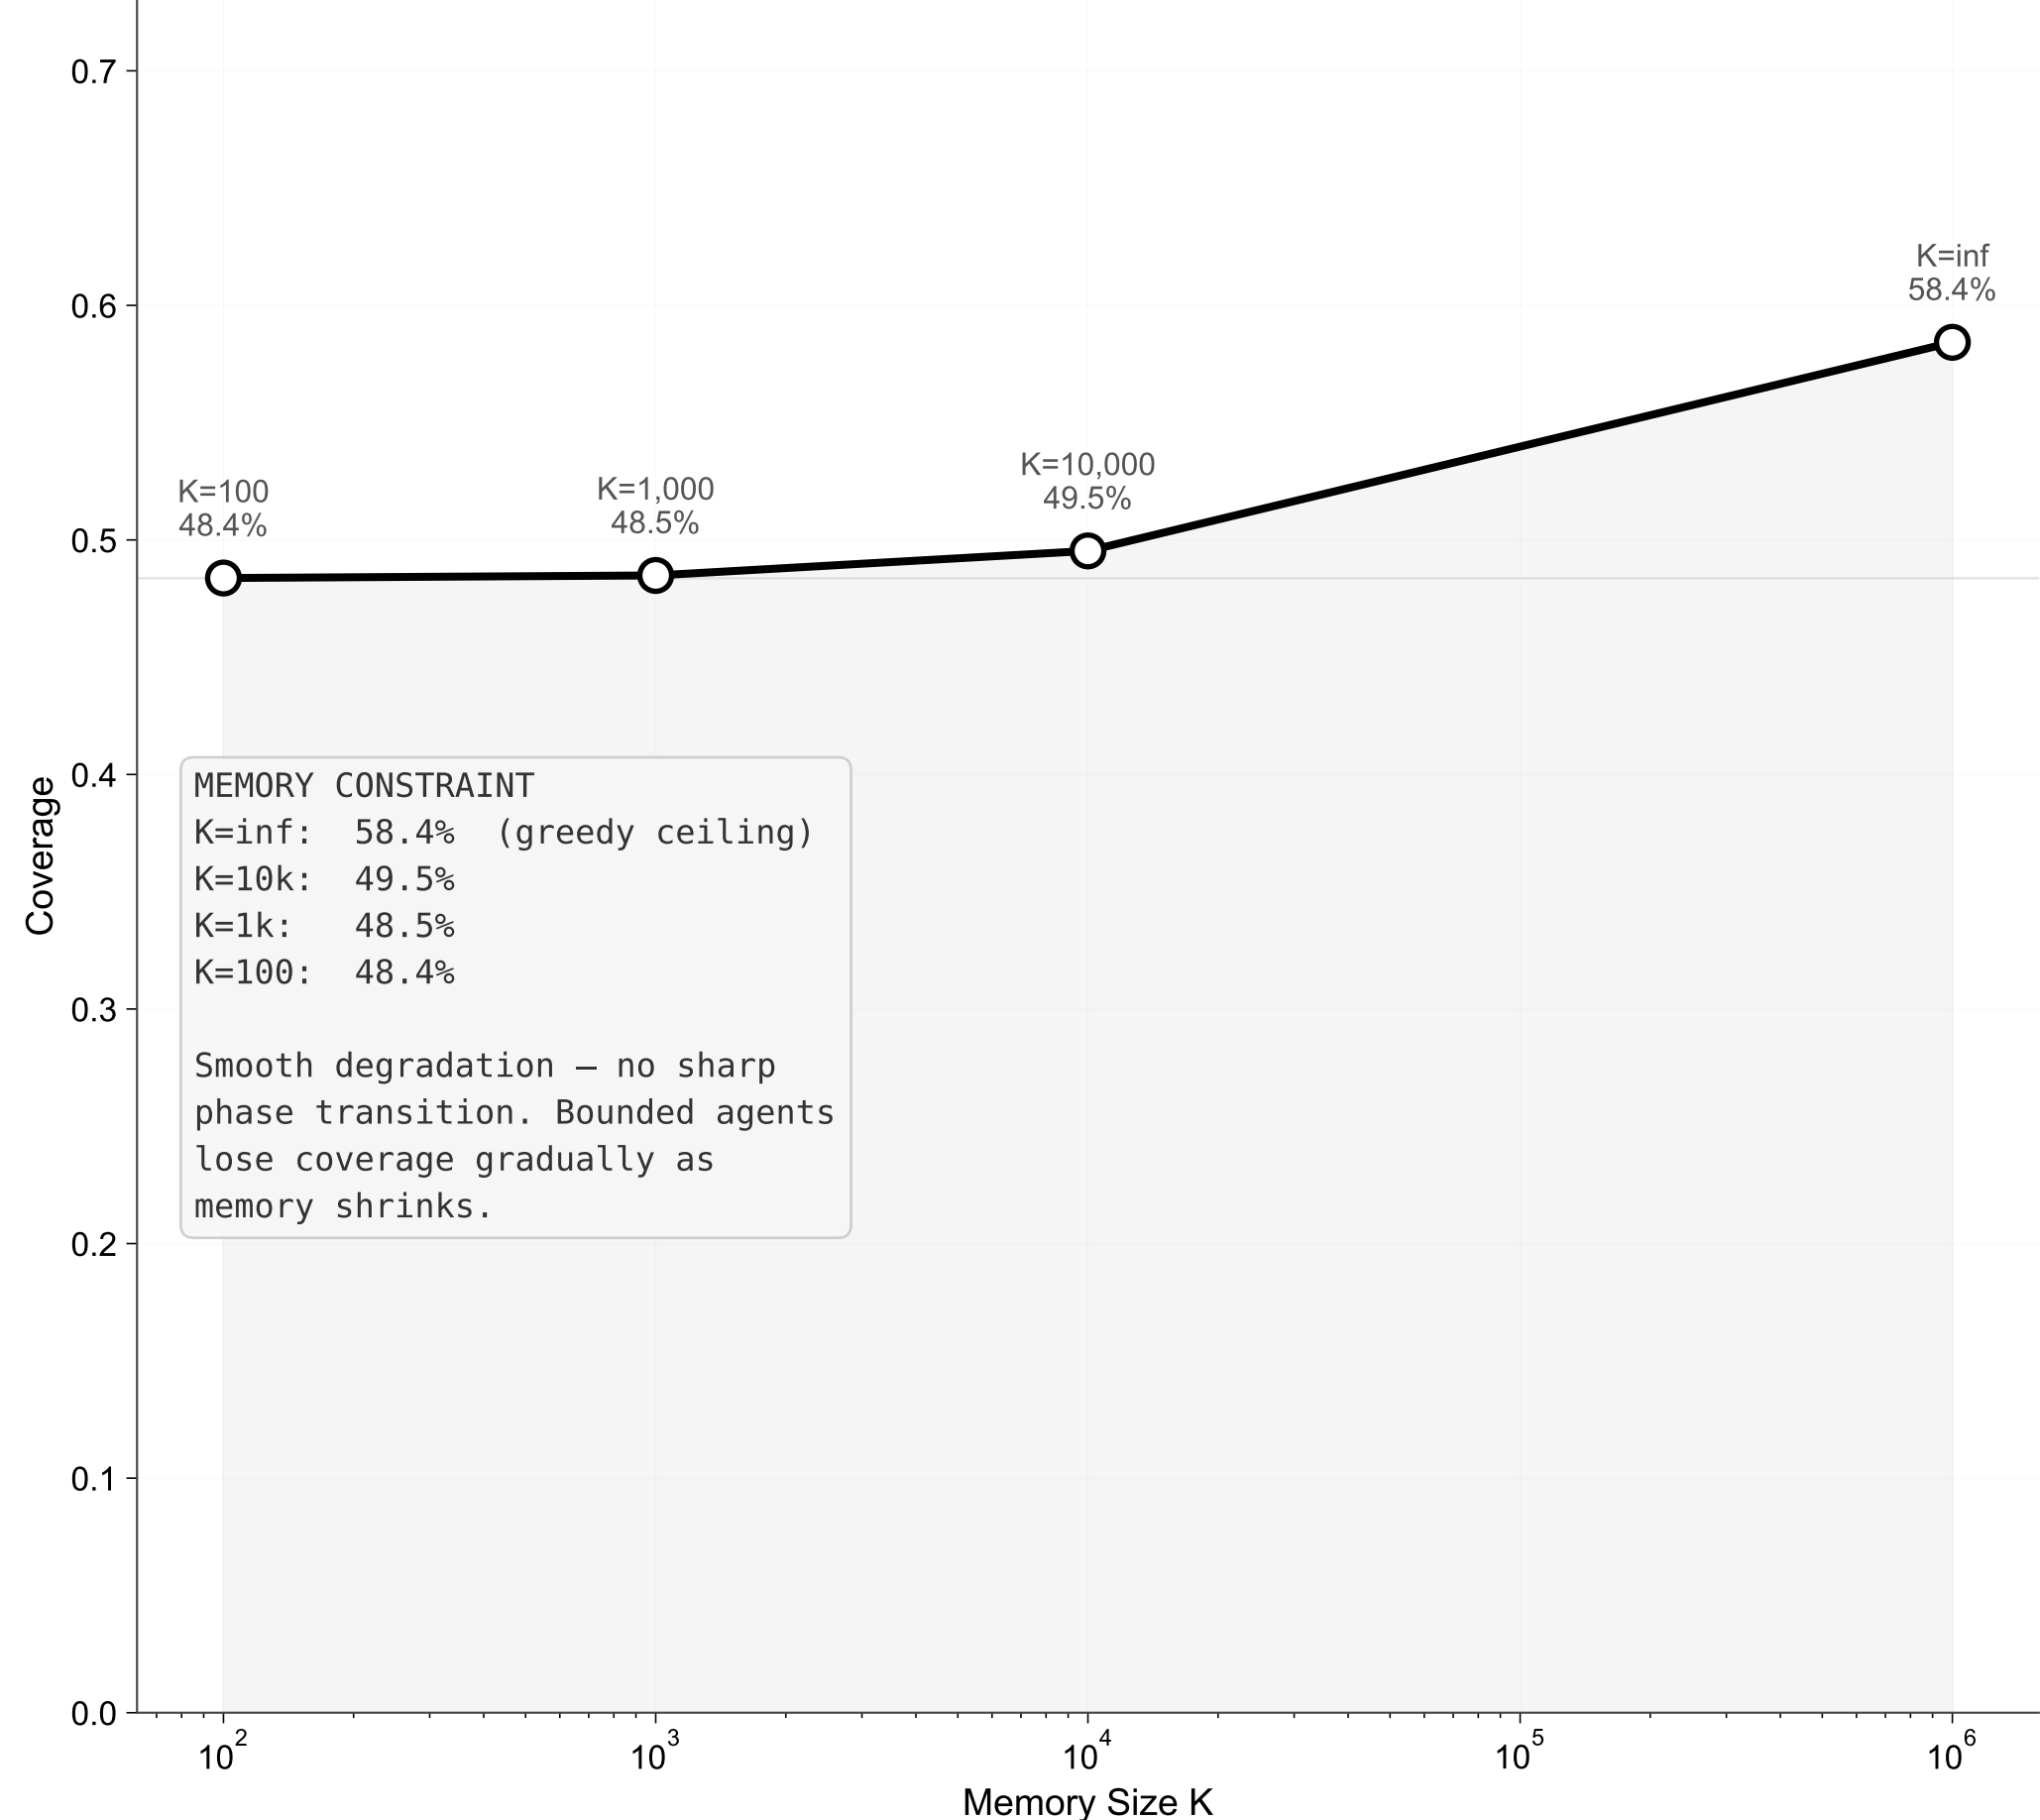

G. Phase: Hub Recall

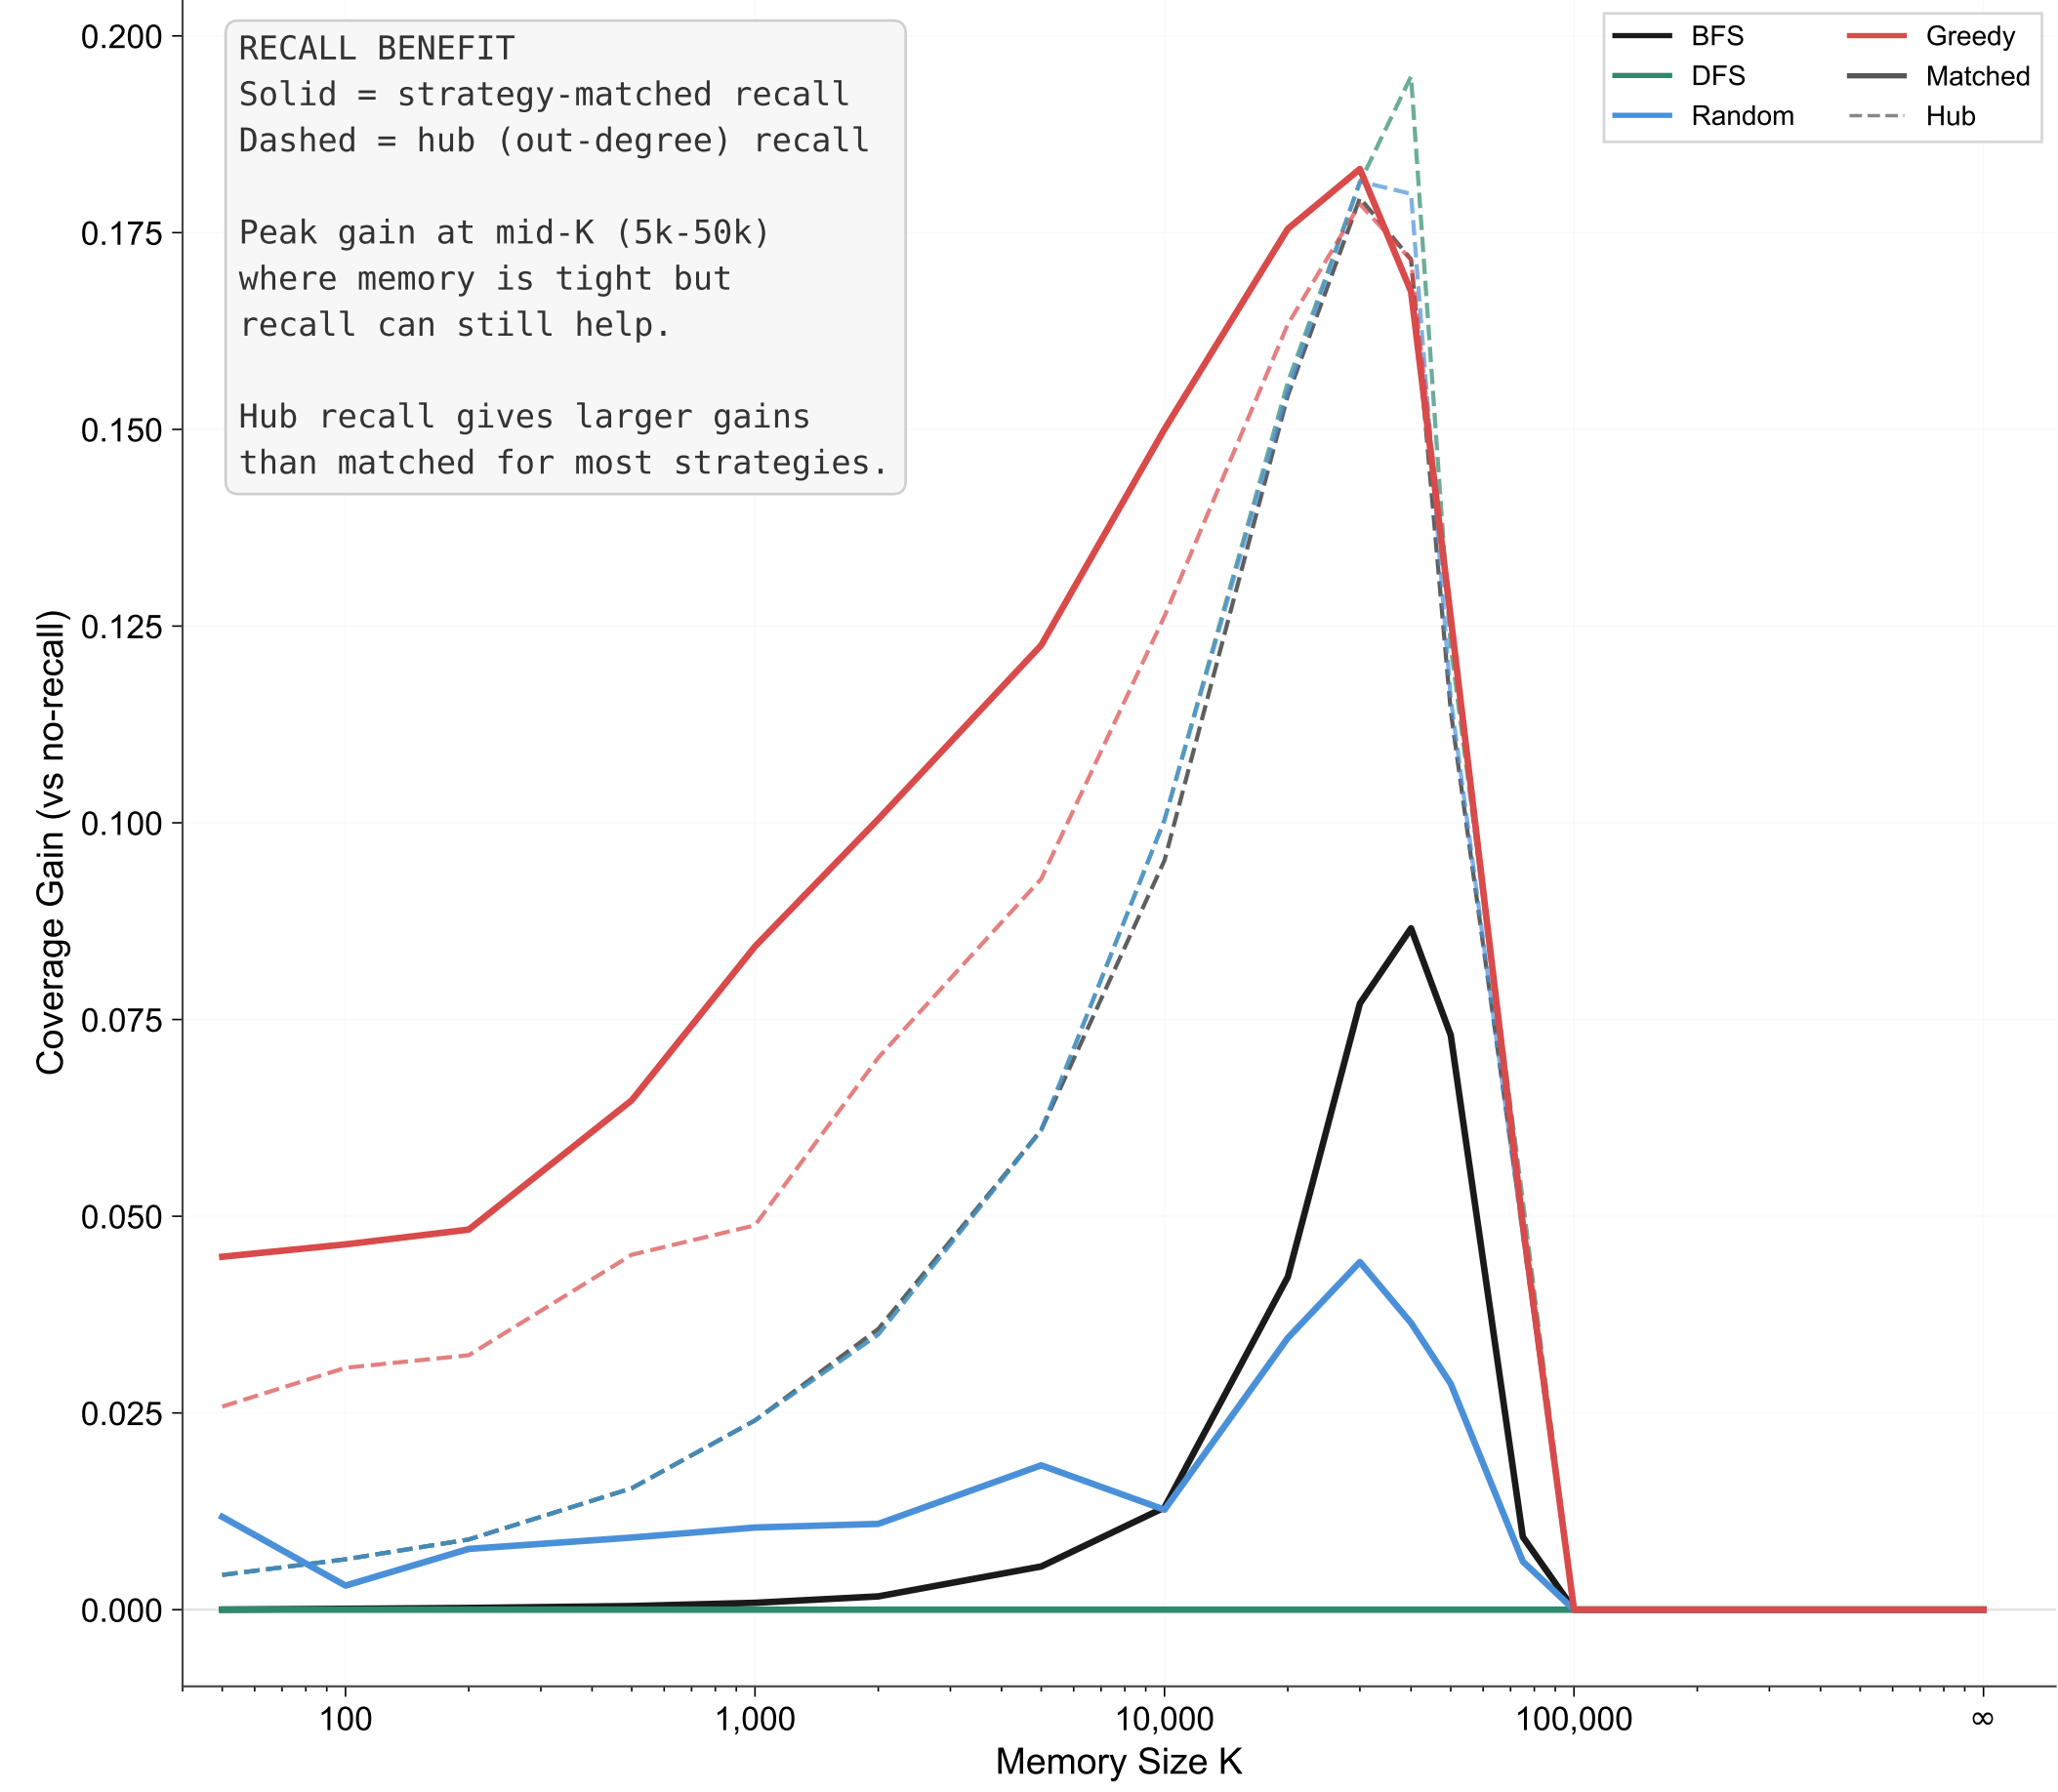

H. Coverage Heatmap (@60k budget)

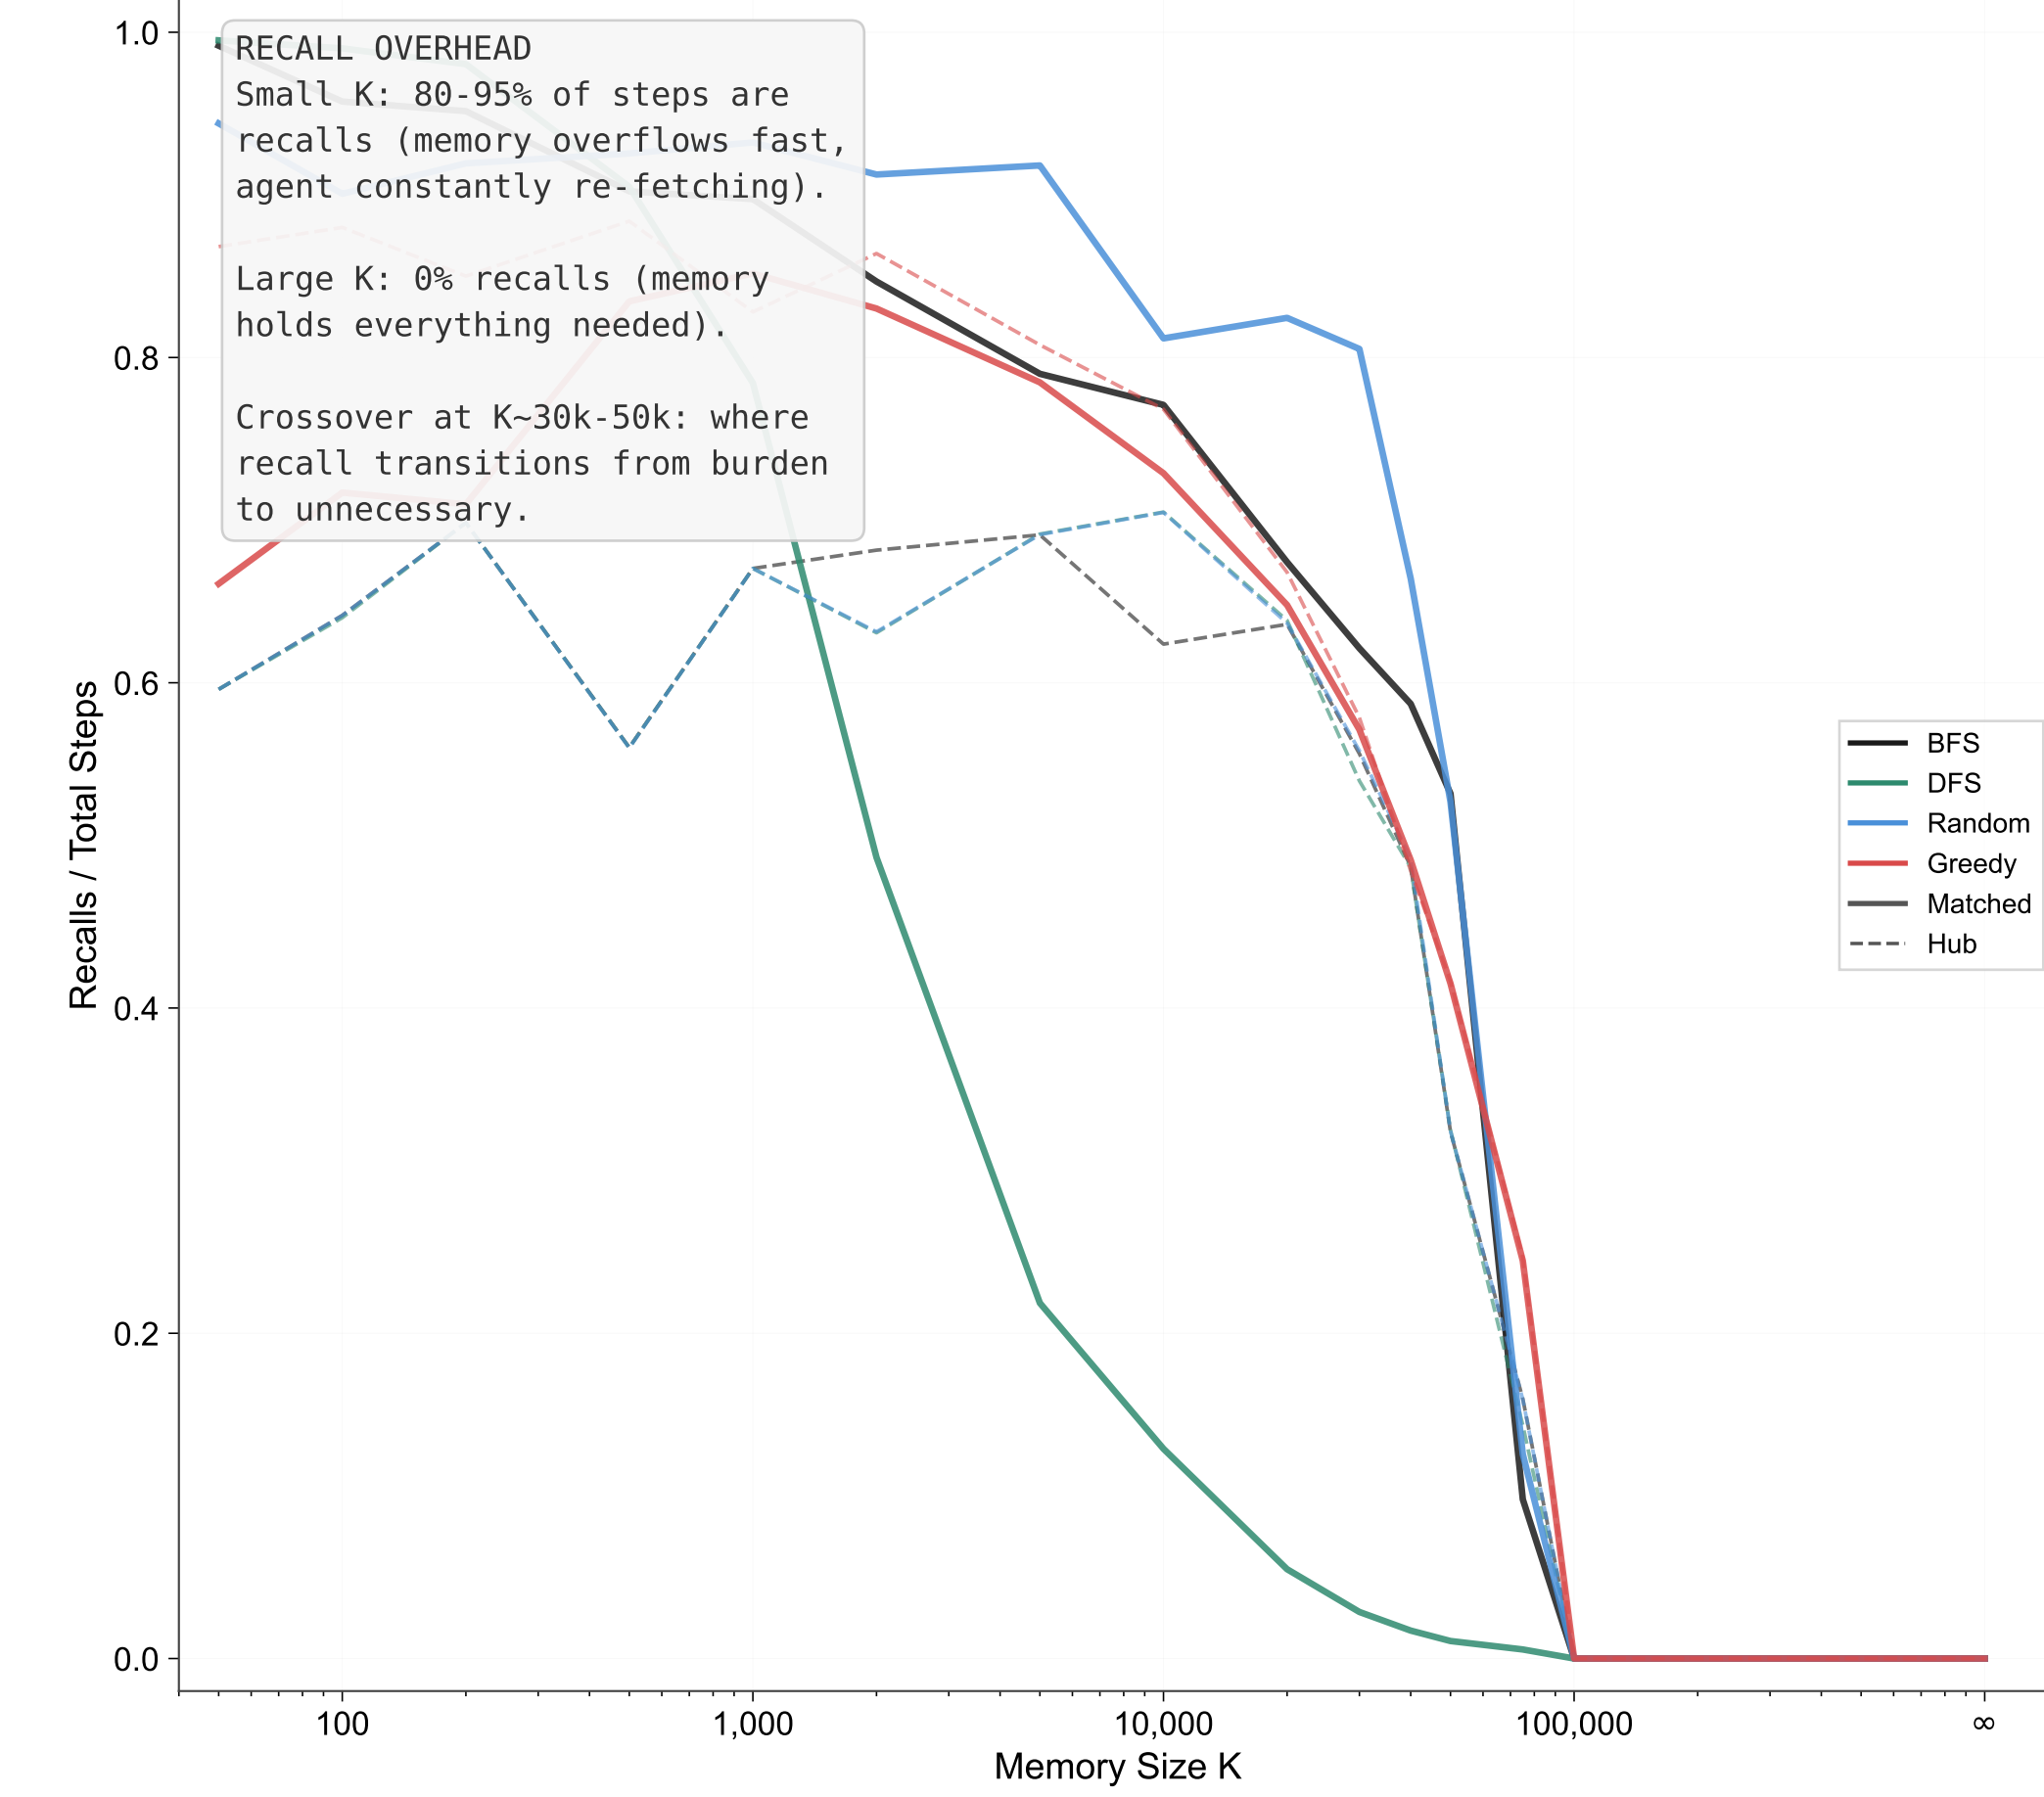

I. Memory-Constrained Discovery (Random)

J. Coverage Gain from Recall (@60k)

K. Recall Fraction (@60k budget)

L. Best Coverage by Strategy x Memory
